

Sequences from InterPro
PF00264 32,753 sequences

AF3 with metal ligands
32,069 structures (highest rank)

Ligand filters
Cu-Cu distance
coordination identity
and pLDDT

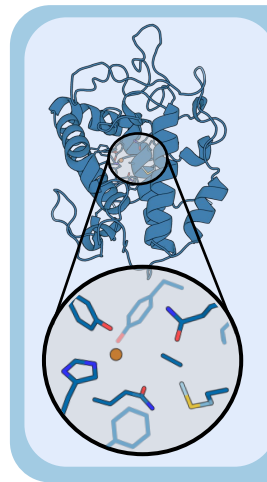

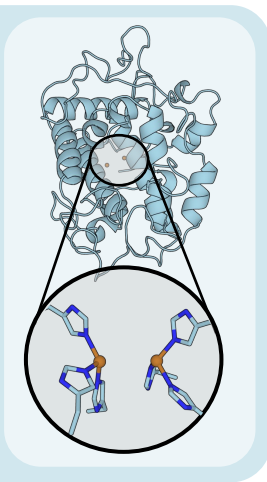

Discarded structures
9,116

Quality filters
Core helix bundle
integrity and pLDDT

Canonical Pool
21,893 structures

Analysis
Second sphere + domains +
genome neighborhood

**Identification of variants with
novel second spheres**

Non-canonical Pool
1,060 structures

Analysis
First sphere + domains +
genome neighborhood

**Identification of
neofunctionalisation/
pseudoenzyme candidates**

Foldseek
Structural clustering
22,953 structures

**Identification of novel
architectures**
